

GROUP 13 (DATASET DETAILS)

Country: The name of the country.

Year: The year of the data observation.

Access to electricity (% of population): The percentage of the population in a country with access to electricity.

Access to clean fuels for cooking (% of population): Indicates the availability of clean cooking fuels or technologies, which is important for reducing indoor air pollution.

Renewable-electricity-generating-capacity-per-capita: The per capita capacity for generating electricity from renewable sources.

Financial flows to developing countries (US \$) (for sustainable energy projects): Financial investments or funding directed towards developing countries for sustainable energy projects.

Renewable energy share in the total final energy consumption (%): The percentage of renewable energy in the total energy consumption.

Electricity from fossil fuels (TWh): The amount of electricity generated from fossil fuel sources in terawatt-hours.

Electricity from nuclear (TWh): The amount of electricity generated from nuclear sources in terawatt-hours.

Electricity from renewables (TWh): The amount of electricity generated from renewable sources in terawatt-hours.

Low-carbon electricity (% electricity): The percentage of electricity generated from low-carbon or clean sources.

Primary energy consumption per capita (kWh/person): The amount of primary energy consumed per capita in kilowatt-hours.

Energy intensity level of primary energy (MJ/\$2017 PPP GDP): A measure of energy efficiency in terms of energy consumed per unit of economic output.

Value_co2_emissions_kt_by_country: Carbon dioxide (CO2) emissions in kilotons (kt) for each country.

Renewables (% equivalent primary energy): The percentage of renewable energy in the equivalent primary energy consumption.

gdp_growth: Economic growth measured as GDP growth.

gdp_per_capita: Gross Domestic Product (GDP) per capita, which is a measure of a country's economic output per person.

Density (P/Km2): Population density, indicating the number of people per square kilometre.

Land Area (Km2): The total land area of the country in square kilometres.

Latitude: The geographic latitude of the country's centre.

Longitude: The geographic longitude of the country's centre.
